Subject: ME Geotextile figure and test holes
Attachments: Main Embankment Geotextile.pdf

Les,

Attached is the figure you requested. The figure shows the areas where there was no geotextile placed under the Zone T haulroad on the Main Embankment. The figure also shows the approximate location of the test holes completed today on the South Embankment. These holes will be surveyed today. We have the auger today and tomorrow only. If you feel more holes are required please let me know where as soon as possible.

Mark
