Thank you for providing the report.

I have a few questions

What is the pond elevation in relation to the core and filter elevations?

Is the freeboard in compliance with the OMS manual, if it is not has the ministry of mines been notified, as there is a risk for a potential spill.

If possible the pond elevation should be reduced to allow for safe working environment and proper tie-in with the previous core lift.

Where the core has been contaminated/compromised the core material will have to be removed, prepared and new material will need to be placed.

I would like to take a look at the prepared surface prior to permanent material placement.

As per the conversation earlier I should be able to be on site in around 10 am.

Thanks,
Dmitri

Hi Dmitri,

I am Levi (Davis' cross -shift).

Sorry I have only been sending the daily reports to Luke, I will start sending them to you as well.

Please see the attached PDF doc, which will give you an idea of what is happening down at corner 3.

Thanks
Levi

Can you send some pictures of the situation

Thanks

Dmitri
