Hello,

After reviewing the VWP and SI data collected over the last couple of weeks and in light of the progress that has been made to raise the till core elevation, we will be returning to the original schedule for data collection. That means that each group of instruments (VWPs and SIs) will be read on alternating weeks. Thanks for your cooperation for the last couple weeks,

Luke Marquis E.I.T
Geotechnical Engineer

Please see the attached daily report, as well as the SI readings from yesterday.

Thanks
Levi
