PAGE 1 OF 2	

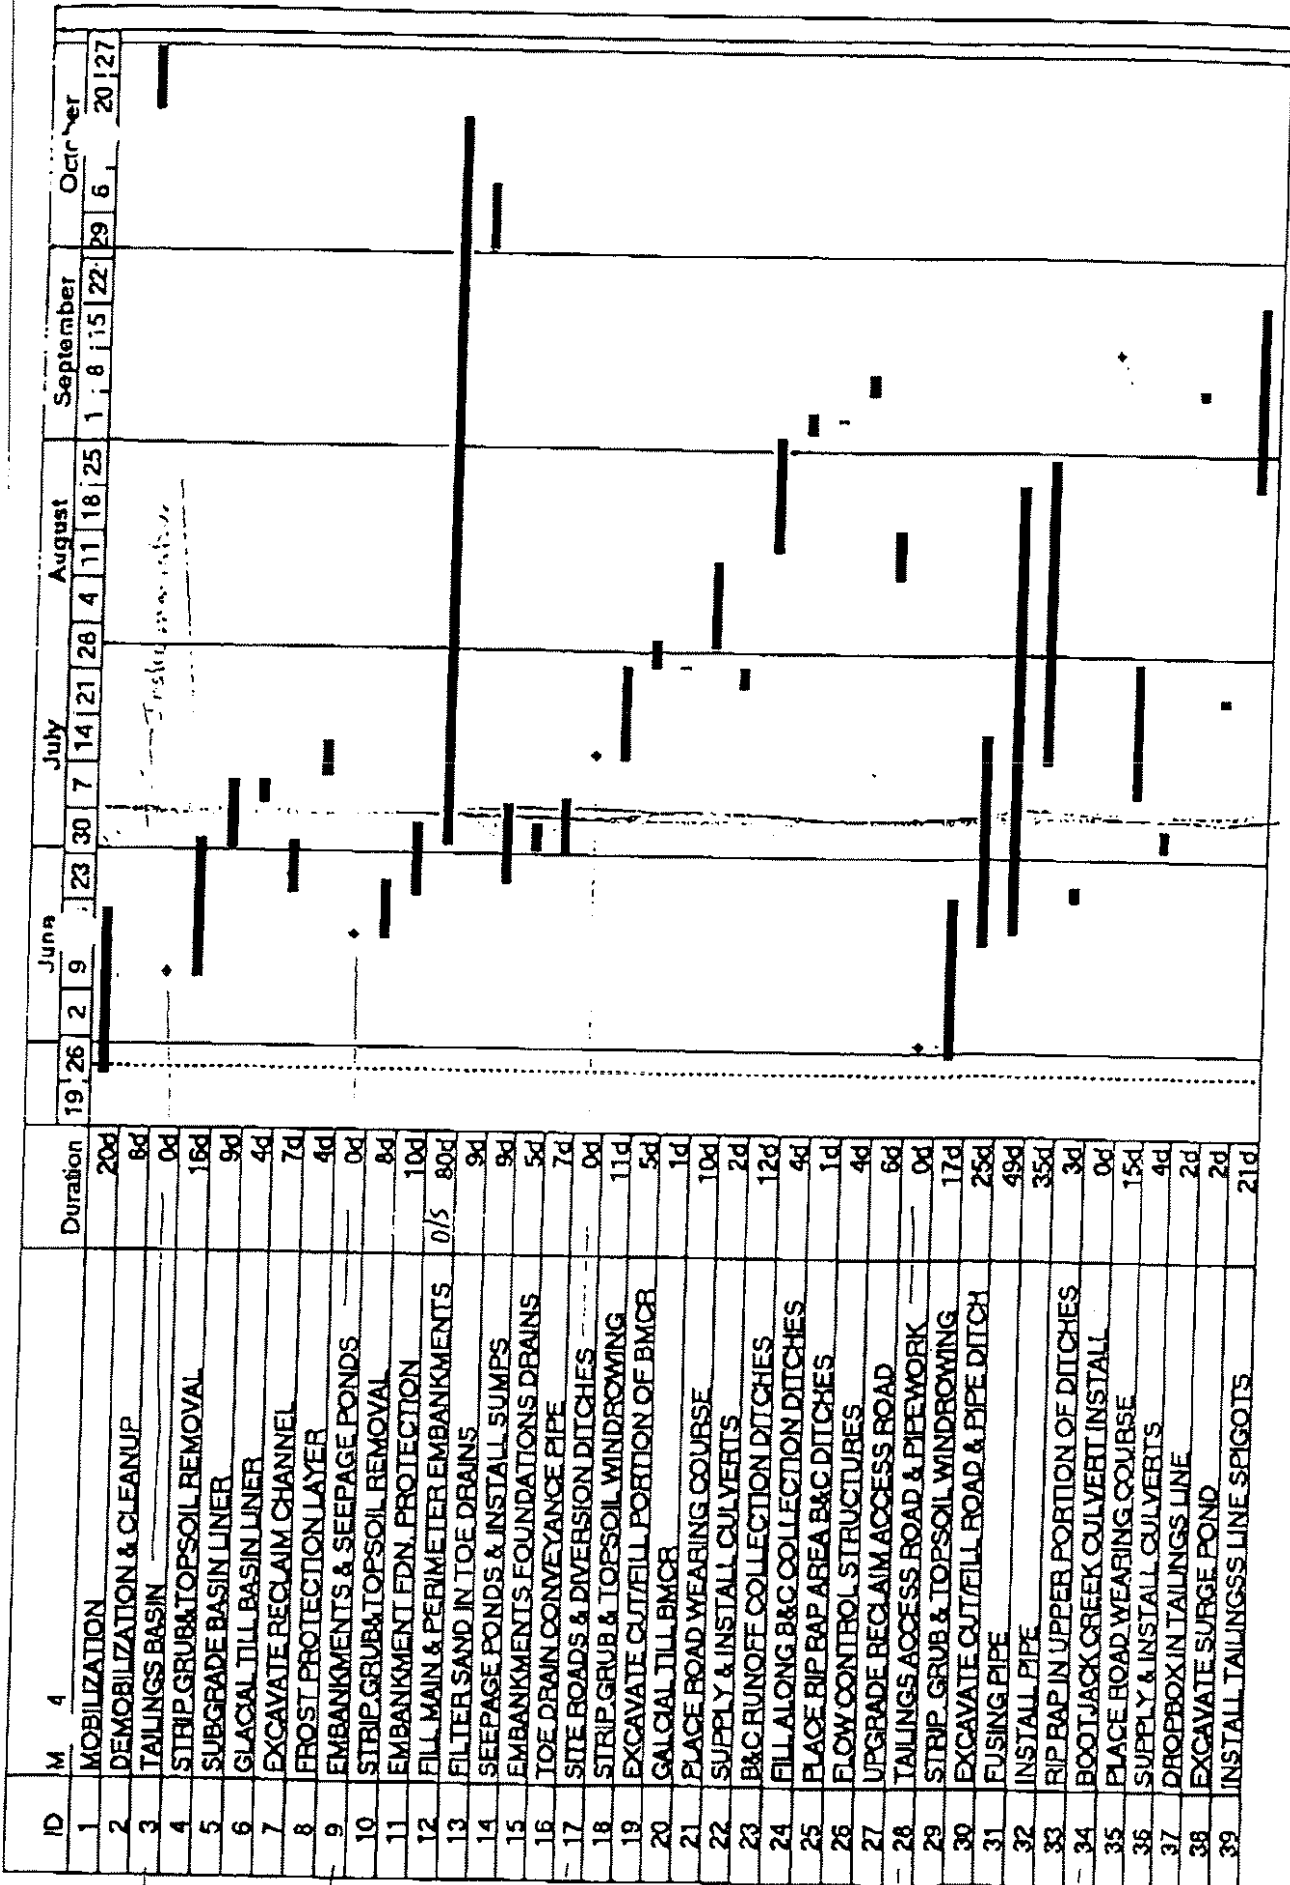

George,

Please find attached a copy of the construction schedule prepared by North American, the tailings contractor. As you can see, they have shown the tailings basin topsoil removal to commence in the second week of June. This might be a bit optimistic. If it is delayed, your site visit planned for June 24 should be a good time to see this work, along with permeability testing, liner placement, etc. If you keep in touch with myself or Ken Brouwer, we should be able to ensure you that your time is not wasted.

Regards,

Ken Embree
