Fax phone: 604-387-1898

Ken,

George Headley forwarded a copy of the Operation, Maintenance and Surveillance Manual, Mount Polley Project, Tailings Storage Facility for our review. Please note the following recommendations for the next edition of this OMS Manual.

- 1.12 Distribution of Manual
1 copy only required for the Comptroller of Water Rights; this should be sent to the Dam Safety Unit, Public Safety Section, Victoria. This applies to the EPP as well
- 4.3 Instrumentation
Are the instrumentation objectives for the Stages 1a and 1b defined in the design report? If so there should be reference to them in the OMS report. The design objectives should answer the questions: what design assumptions are being monitored by the various instruments, what reading accuracy is required and what range of instrumentation readings are expected for the various reservoir levels? The objectives should identify in advance (where possible) the expected normal readings and the range of anomalies requiring investigation or alert.
- Emergency contacts: PSP Hq. tel.# 1 800 663 3456 and PEP Regional Manager, Prince George, 250 565 6115
Dam Safety, Public Safety Section Victoria, 250 387 1531 and Regional Water Manager, Wms Lake 250 398 4576
Mines; as noted

Will Jolley, Senior Dam Safety Officer
