Great. I have those emails ready to go to Teresa. Will send over now.

I requested a password from Elkview, so I will be able to download next time.

I have left a message with Luke at Mount Polley regarding OMS/water balance reports. I will continue working on this permit amendment. For clarification, is Luke's original email (and subject title) the formal amendment request?

Glad your meeting ended early ☺

Hi Heather,

Just FYI – the CMO and EVO reports are both in their respective Mine List folders now and could be GRITed by Teresa. The Blackwater meeting ended a little early.

George

Thank you George,

We are striving to ensure all recommendations are satisfied in the report. So that you are updated, CMO has successfully completed 34 pit bottom recovery as at April 3<sup>rd</sup>, 2014, and are currently backfilling with waste rock from 37 pit at controlled rates

Regards  
Brad

Thank you Brad,

I have downloaded the annual pit slope review for CMO. This report will be reviewed in due course as time permits. Please ensure that all recommendations are satisfied as appropriate. As noted for other reports, EMNG considers any recommendations relating to health & safety or geotechnical stability to be mandatory requirements.

Regards,

George
